

PROGRAM OVERVIEW

The Duke Distributed Master of Engineering Management Program (d-MEMP) is an **industry-focused, interdisciplinary degree** for working technical professionals. Duke's innovative **low-residency distance approach** uniquely integrates the flexibility of online classes with cohort-centric residencies.

- Earn a Duke Master of Engineering Management degree in 2 years while working full-time from anywhere in the world
- Study the core curriculum of management, marketing, finance, and intellectual property/business law
- Cultivate expertise in commercializing technology innovations, data analytics, operations and supply chain management or product design and development through a broad selection of course electives
- Connect with peers, faculty and staff on Duke's campus in Durham, North Carolina for 3 week-long residencies focused on personal and professional development
- Collaborate with a supportive cohort of like-minded colleagues committed to growth

THE DISTANCE ADVANTAGE FOR EMPLOYEES

- Maintain career momentum while building relevant skills in the classroom
- Make immediate contributions by applying new knowledge in the workplace
- Leverage flexible program options that support work-life integration

THE DISTANCE ADVANTAGE FOR EMPLOYERS

- Attract, recognize and retain top talent through sponsorship for graduate-level education
- Make a mutually beneficial investment in the growth and vitality of the organization
- Gain critical insight about emerging trends, proven techniques and best-of-breed tools for business transformation

WHY CHOOSE DUKE?

- An interdisciplinary environment with strong collaborations between the Pratt School of Engineering, the Fuqua School of Business, and the Duke School of Law
- An inclusive, close-knit community of peers & mentors within Engineering Management and across Duke—and an outstanding worldwide network of alumni
- Custom coursework selection, enabling students to advance their interests while meeting academic requirements
- A personalized learning experience centered on the goals and needs of each individual student
